EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

- Authorization for this examiner's amendment was given in a telephone interview with applicant's representative Ms. Elizabeth A. Stanek (Reg. No. 48,568) on January 09, 2006.
 - 3. The application has been amended as follows:

In the claims

<u>Claim 1:</u>

 (Currently amended) A method for type of service classification of a communication request for an application executing on a server, the method comprising the steps of:

providing an application plug-in associated with the application, the application plug-in being in an operating system kernel of the server;

wherein the application plug-in performs the following steps:

receiving the communication request;

obtaining application level information from the received communication request;

assigning a type of service classification to the received communication request based on the obtained application level information; and

Art Unit: 2155

providing the assigned type of service classification information for the communication request to a process executing on the server for processing communications from the server responsive to the communication request.

Claim 20:

20. (Currently amended) A system for type of service classification of a communication request for an application executing on a server, the system comprising:

a communication process executing on the server that processes communications between the server and a communication network associated with the communication request based on an associated type of service classification; and

an application plug-in process associated with the application <u>an being</u> in an operating system kernel of the server that obtains application level information from the received communication request, assigns the type of service classification to the received communication request based on the application level information and provides the assigned type of service classification to the communication process.

Claim 22:

22. (Currently amended) A system for type of service classification of a communication request for an application executing on a server, the system comprising:

Art Unit: 2155

a communication process executing on the server that processes communications from the server responsive to the communication request; and an application plug-in associated with the application <u>and being</u> in an operating system kernel of the server;

wherein the application plug-in further comprises:

means for receiving the communication request;

means for obtaining application level information from the received communication request;

means for assigning a type of service classification to the received communication request based on the obtained application level information; and means for providing the assigned type of service classification information for the communication request to the communication process.

Claim 33:

33. (Currently amended) A computer program product for type of service classification of a communication request for an application executing on a server, comprising: a computer-readable storage medium having computer-readable program code embodied in said medium, said computer-readable program code comprising:

application plug-in computer-readable program code associated with the application for execution, the application plug-in computer-readable program code being in an operating system kernel of the server;

Art Unit: 2155

wherein the application plug-in computer-readable program code further comprises:

computer-readable program code which receives the communication request;

computer-readable program code which obtains application level information from the received communication request;

computer-readable program code which assigns a type of service classification to the received communication request based on the obtained application level information; and

computer-readable program code which provides the assigned type of service classification information for the communication request to a process executing on the server for processing communications from the server responsive to the communication request.

Allowable Subject Matter

4. Claims 1-43 are allowed.

The following is an examiner's statement of reasons for allowance: The prior arts or record fails to disclose or suggest system and method for type of service classification of a communication request for an application executing on a server comprising: providing an application plug-in associated with the application, wherein the application plug-in being in an operating system kernel of the server; wherein the application plug-in performs the steps of receiving the communication request; obtaining application level information from the received

Art Unit: 2155

communication request; assigning a type of service classification to the is received communication request based on the obtained application level information; and providing the assigned type of service classification information for the communication request to a process executing on the server for processing communications from the server responsive to the communication request, in conjunction with all other limitations in the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thu Ha Nguyen, whose telephone number is (571) 272-3989. The examiner can normally be reached Monday through Friday from 8:30 AM to 5:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Najjar Saleh, can be reached at (571) 272-4006.

The fax phone numbers for the organization where this application or proceeding is assigned are (571) 273-8300 for regular communications.
